Registered as a Nonprofit Organisation:
Reg No: 004-300 NPO

DONOR EXCLUSION CRITERIA

Potential stem cell donors must be in good health and must have no condition that, by donating, would adversely affect:

1. the health of the donor
2. the health of the patient
3. the successful completion of an apheresis procedure.

If any one of the following applies to you, unfortunately you will be unable to join the South African Bone Marrow Registry as a potential Peripheral Blood Stem Cell (PBSC) Donor:

- You are under 18 or over 45 years of age
- You do not live in South Africa or will be in the country for less than two years
- You weigh under 50kg or are significantly overweight (with a BMI >40)
- You (or your partner) are, or think that you might be, HIV or HTLV positive
- You (or your partner) are, or think that you might be, positive for the hepatitis B or C viruses
- You engage in behaviour which places you at risk for sexually transmissible infections
- You have ever been injected (even once) with non-prescription drugs, including body-building drugs - or you have a chemical dependency
- You are on prescribed medication that, if necessary, cannot be stopped should you be a match for a patient. Please confirm with your doctor before registering.
- You have an inherited blood disorder e.g. Fanconi anaemia, Sickle Cell disease or Thalassaemia, including being a carrier for any of these conditions
- You have a bleeding/clotting disorder e.g. Factor V Leiden mutation, Haemophilia, Protein S deficiency, Prothrombin gene mutation, thrombocytopenia, thrombocytosis, von Willebrand disease - or are a carrier for any of these conditions
- You have current eczema or frequently occurring eczema
- You have severe asthma e.g. more than 2 attacks in the last year and are on oral medication
- You have more than 2 migraine attacks / month
- You are a para- or quadriplegic
- You have had a splenectomy
- You are a transplant recipient
- You have tuberculosis (TB) and are undergoing treatment
- You are taking more than 2 anti-depressant / anti-anxiety medications
- You have been diagnosed with bipolar disorder and are on lithium treatment.
- You are on steroid or blood-thinning medication
- You have had a tattoo in the last 4 months
- You have, or have ever had, any of the following:

- An allergy to latex, anaesthesia, paracetamol
 - Any auto-immune condition including Alopecia areata, Ankylosing spondylitis, Coeliac disease, Cold Agglutinin disease, Graves' disease, Goodpasture's syndrome, Hashimoto's thyroiditis, Myasthenia gravis, Pernicious anaemia, Psoriasis, Raynaud's disease, Reiter's syndrome, Rheumatoid arthritis, Sarcoidosis, Scleroderma, Sjögren's syndrome, Systemic Lupus Erythematosus (SLE), Ulcerative colitis or Crohn's disease, Uveitis, Vasculitis, Vitiligo
 - Bi-polar disease
 - Brain surgery
 - Cancer
 - Chronic Obstructive Pulmonary Disease (COPD)
 - Diabetes – unless controlled by diet alone
 - Epilepsy
 - A haematological (blood) disorder
 - Heart disease or heart surgery
 - Kidney disease - or have had a kidney removed
 - Meniere's disease
 - A neurological condition e.g. Fibromyalgia, Guillain-Barré syndrome, Multiple sclerosis, Muscular dystrophy
 - Parkinson's disease
 - Schizophrenia
 - Sciatica
 - Stroke or Transient Ischaemic Attacks (TIAs)
- You are pregnant or are on fertility treatment
 - You have a first degree relative with acute myeloid leukaemia (AML) or myelodysplastic syndrome (MDS)
 - You have ANY OTHER condition that excludes you from being a blood donor or, if for ANY reason, you are not eligible to donate blood.

If you have any queries, please contact the South African Bone Marrow Registry
